Respondent

QUALIFICATIONS AND EXPERIENCE

1 My name is Andrew Bazel Conrad Feierabend.

2 I am employed by Meridian Energy Limited (Meridian). My qualifications and position with Meridian are described in my primary statement of evidence dated 15 February 2019.

SCOPE OF REBUTTAL EVIDENCE

3 This evidence responds to the evidence of Peter Horrell the Co-Chair of the Waiau Rivercare Group Incorporated (WRG), in support of WRG's Section 274 Notice filed on Meridian's appeal. Mr Horrell's statement of evidence is dated 22 March 2019.

REBUTTAL EVIDENCE

4 This rebuttal evidence responds to three matters raised in Mr Horrell's statement. The first matter relates to issues discussed at paragraphs 21–24 of his evidence on the security and potable quality of the Tuatapere Water Supply. The second matter relates to statements made at paragraphs 36–37 with respect to the release of hydrological data owned or managed by Meridian. The third matter relates to statements made at paragraphs 39–64 relating to "Community Consultation", "The 1973 Agreement" and the "1996 Waiau Agreement" with a particular focus on river erosion.

5 The above statements have been made to support WRG's position as to how Objective 10 of the Proposed Southland Water and Land Plan (PSWLP) should be drafted.

6 I do not express a view as to whether the matters Mr Horrell raises are relevant to the wording of Objective 10 and leave that for counsel to address with the Court. However, to the extent that these matters may be relevant to the wording of Objective 10 the purpose of this rebuttal evidence is to ensure the Court has before it an accurate account of those matters from Meridian's perspective.

TUATAPERE WATER SUPPLY – SECRUITY OF SUPPLY

7 At paragraphs 21–24 of his evidence Mr Horrell makes several comments in which he describes what he says are impacts the Manapouri Power

Scheme (MPS) has had on the quality and security of the Tuatapere town water supply. At paragraph 24 Mr Horrell describes these impacts as "an example of the ongoing impact on the quality of life for the Tuatapere community from the MPS under the status quo." Mr Horrell then ties these views to an inference that further degradation to this supply could occur "…under the auspices of enhancement" of the MPS.

8 As part of a mitigation agreement associated with the Waiau Working Party process in 1996 and the consenting of the MPS under the Resource Management Act (as described in my evidence in chief), the Electricity Corporation of New Zealand Limited (ECNZ) undertook to provide $200,000 to move the Tuatapere town water supply to one that was entirely based on the use of groundwater.

9 The purpose of this work was to enhance the Tuatapere town supply from one which existed since the MPS was constructed by removing water quality issues associated with high river flows and associated turbidity. The scheme prior to this date was based on a mixed groundwater/surface water take of which 55% came from the Waiau River and 45% came from groundwater.[1] In June 2011 Meridian Energy provided a further $319,890 to assist the Southland District Council to carry out additional upgrading works to this water supply to further improve water supply quality and security.

10 I am not aware of any ongoing issues associated with the quality or quantity of water associated with the Tuatapere Township Water supply from the perspective of public health or security of supply. I was therefore surprised to read Mr Horrell's comments. To confirm if such issues existed I communicated with the Southland District Council on this matter.

11 On Wednesday 10 April 2019 Mr Ian Evans, the Strategic Manager Water & Waste for the Southland District Council, confirmed in an email that the Council is not aware of any concerns over the security of supply to the Tuatapere water supply. A copy of this email communication is attached as Appendix 1.

[1] ECNZ Manapouri Power Scheme Assessment of Effects on the Environment Section 12.2.3 page 141

12 Mr Evans also provided a copy of a drinking water assessment report for the Southland District Water Supplies.[2] Mr Evans noted that Tuatapere is compliant for the main points covered in the report. The same report confirms that the Southland District Council meets its duties as a water supplier under the Health Act 1956 with respect to the provision of drinking water, the requirement to take reasonable steps to contribute to the protection of the source of water and its duties to keep records and investigate complaints.

PROVISION OF ACCESS TO THE HYDROLOGY RECORD TO THE WRG

13 In paragraphs 36–38 of Mr Horrell's evidence reference is made to the availability of and access to the hydrological record prior to 2005 which is either owned by or managed on behalf of Meridian.

14 In paragraph 37 Mr Horrell states:

> *"MEL advised that it was prepared to release the hydrograph to the WRG as raw data in 5-minute increments, but not for third party use. That, in the view of the WRG, would have precluded the data being used in the matter presently before the Court. Consequently, the WRG declined the offer on the 12 March 2019."*

15 The terms and conditions applied by Meridian in response to the request made by the WRG for access to the hydrological record prior to 2005 is set out in email correspondence from me to Mr Paul Marshall in his capacity as the co-Chair of the WRG on 6 March 2019. This email communication is attached as Appendix 2 to this evidence.

16 As described in this communication the terms of the release of hydrological data did not preclude its use for these Court proceedings. The terms and conditions established are consistent with how Meridian approaches any requests from external parties wanting to make use of data it collects and maintains

17 Meridian's expectation in offering access to the information was that it would be considered by WRG's independent experts for use by WRG in the current proceedings. The conditions of use relating to compiling and provision of such data to third parties seeks to ensure that it is for a proper

[2] Report on Compliance with the Drinking-water standards of New Zealand 2005 (Revised 2008) and duties under the Health Act 1956 For the period:1st July 2017 to 30 June 2018 … Water Supplier: Southland District Council – Prepared by South Island Drinking Water Assessment Unit-Public Health South-Dated 4 January 2019

purpose and not for commercial gain. I was verbally told by Mr Marshall on 12 March 2019 that the WRG would not be taking up Meridian's offer to access Meridian's data because of the conditions of use. There was no elaboration as to which conditions were of concern to the WRG. I was therefore surprised to read Mr Horrell's comments at his paragraph 37.

MANAPOURI POWER SCHEME – 1973 WAIAU AGREEMENT AND 1996 ECNZ, FEDERATED FARMER SOUTHLAND INC & SOUTHLAND REGIONAL COUNCIL AGREEMENT AND ITS RELATIONSHIP TO MANAGEMENT OF EROSION IN LOWER WAIAU RIVER

18 At paragraph 39 of his evidence Mr Horrell draws the Court's attention to those parts of my evidence in chief which discuss the process that was used to consent the MPS in 1996 and the agreements arising from that.

19 At paragraph 40 Mr Horrell then raises the fact that my evidence does not reference a 1973 Agreement between the New Zealand Electricity Department and the Southland Catchment Board. In Mr Horrell's opinion this earlier agreement is significant. Mr Horrell says at paragraph 40 that this 1973 agreement "…establishes a causal relationship between the operation of the MPS and damage from erosion and flooding downstream of the MLC structure".

20 Mr Horrell further describes what he thinks is the relevance of the 1973 Waiau Agreement at paragraphs 41–47 for these proceedings and then goes on to describe the 1996 Agreement and the establishment of a special rating district in the Lower Waiau Catchment.

21 At paragraph 51 of his evidence Mr Horrell states that, amongst other matters, on the establishment of the Waiau Special Rating District this triggered, "b The removal from the purview of the Liaison Committee responsibility for managing the damage from erosion."

22 At paragraph 54 Mr Horrell notes there have been no settlements for damage from erosion by the owners of the MPS since 1991. At paragraphs 60–61 Mr Horrell provides an example of where a claim for erosion compensation was made. At paragraph 61 Mr Horrell notes an independent expert investigation as to causes concluded this erosion was not an outcome of the MPS. However Mr Horrell then says (at paragraph 62) that the WRG concludes the expert advice was contrary to the 1973 Waiau Agreement, the intent of the 1996 Agreement and the intent of condition 11 of Resource Consent 96022.

23 In response to the matters raised by Mr Horrell a copy of the 1996 ECNZ – Federated Farmers Southland Incorporated & the Southland Regional Council (the 1996 Agreement) is attached to this evidence as Appendix 3.

24 Clause 8 of the 1996 Agreement explicitly acknowledges that it was in substitution of the 1973 Waiau Agreement and I have been advised that as a matter of law this earlier agreement ceased to have effect at the time of the grant of the resource consents.

25 In 1998 the Southland Regional Council promoted and approved the establishment of the Waiau Rating District as an outcome of the 1996 Agreement. The Special Order that formed the basis for establishing the Rating District is attached to this evidence as Appendix 4.

26 The Special Order notes that in establishing the Rating District, the Council took into account that it, "…considered the benefits likely to accrue to properties within the District directly or indirectly are flood protection, improved drainage, noxious plant control, stock fencing on main channel, erosion control, maintenance of high quality water resource and protection of community." The Waiau Special Rating District formally came into being on 1 July 1998.

27 On the adoption of the Waiau Rating District the 1996 Agreement was suspended as provided for in clause 7.2 of that agreement. This was in recognition of the fact that most of the funding associated with the Rating District was coming from ECNZ or its successors and secondly that any works within the Rating District, including erosion control (irrespective of the cause of that erosion), would attract a dollar for dollar subsidy.

28 This approach was also mirrored in the ECNZ Manapouri Power Scheme Assessment of Effects on the Environment (AEE) dated 1996 which supported the application for Resource Consents for the MPS. The relevant extract from the AEE is attached to this evidence as Appendix 5.

CONCLUSION

29 Mr Horrell's statements on behalf of the WRG relating to the current state of the Tuatapere water supply are erroneous. Meridian's position on access to hydrological data it owns has been misinterpreted by the WRG, and the 1973 Waiau Agreement ceased to have effect on the grant of the MPS consents in accordance with the 1996 Agreement.

30 On the establishment the Waiau Rating District on 1 July 1998 the Southland Regional Council took back the financial responsibility for all matters relating to river management associated with erosion as set out in the Special Order mandating this dedicated entity.

Hi Andrew
Further to our catch up call I have confirmed with our operations manager that we are not aware of any concerns over security of supplies to the Tuatapere community water supply. Also attached is the current drinking water assessor report on SDC compliance. Tuatapere is compliant for main points covered in the report.

Thanks

Subject: RE: Hydrographic record through the MLC Structure prior to mid 2005

Hi Paul

Thank you for your email which I have just picked up after been away on leave.

I respond to your requests below:

Data Access:

Meridian has no difficulty with Environment Southland releasing to you the hydrographic record for flows into the Lower Waiau River.

As I understand it this information is raw data and may not have been subject to normal quality control processes relating to the integrity of this data set.

If the WRG intends to make use of it you should confirm with ES any limitations associated with it.

NIWA is the holder of the archived data which is either fully or partially funded by Meridian depending on the collection point.

Meridian is prepared to provide access to the archived data set if we enter an agreement covering the following matters:

- A clear understanding of the purposes and use of the data requested;
- That use of the data that would be provided is limited to the purpose of the agreement; and
- That the data will not be distributed or be provided to a third party without prior written agreement.

This is a standard policy for any user of this data.

I understand a similar agreement would also be a requirement of NIWA who funds a share of some of the data collected at Tuatapere. They also have a data file preparation charge which they apply to such requests.

If the WRG wants to proceed with such a request you will need to confirm the format and specific data sets you want. The Waiau River Below Manapouri Lake Control data starts 1-Jun-1977 and the Tuatapere data starts 28-Jul-1964.

By their nature these files are very large as you can appreciate and are compiled on 5 minute intervals.

Meeting Request:

I note your request to meet with Meridian.

The session that is occurring in Te Anau in March is not the right forum for these discussions.

Hamish Cuthbert, Meridian's Head of Environment, Generation and Natural Resources and myself are prepared to meet with you and representatives of the WRG at an agreed time to discuss and understand your Groups objectives.

If you wish to pursue this matter we can agree to the timing and location of such a meeting.

Regards

Andrew

Subject: Hydrographic record through the MLC Structure prior to mid 2005

Hi Andrew
The Waiau Rivercare Group Inc would like to source the hydrographic record for the flows into the lower Waiau. We have the hydrographs from August 2005 onward (sourced from the ES website). ES apparently requires Meridan's permission to release the hydrographic record earlier than that date.

Please confirm to ES that the hydrographic record should be released to the WRG Inc at their earliest convenience.

Thank you for your help in this matter.

As an aside, we appreciated your offer for Merdian to work with the WRG Inc to achieve improved environmental outcomes for the lower Waiau. To that end, we understand that Meridian's senior management team will be in Te Anau around 17 March. Peter Horrell and I would be prepared to set aside time and travel to Te Anau to meet with your strategy team to discuss with them our concerns and a possible way forward.

Regards

Paul Marshall
Co Chair
Waiau Rivercare Group Inc

ELECTRICITY CORPORATION OF NEW ZEALAND LIMITED

and

FEDERATED FARMERS SOUTHLAND INCORPORATED

and

THE SOUTHLAND REGIONAL COUNCIL

AGREEMENT

ANN CALLAGHAN
SOLICITOR
P O BOX 930
WELLINGTON
NEW ZEALAND

Tel: (04) 472 3550
Fax: (04) 473 7091

THIS AGREEMENT dated 1996

PARTIES:

1. **ELECTRICITY CORPORATION OF NEW ZEALAND LIMITED** a duly incorporated company having its registered office at Wellington ("ECNZ")

2. **FEDERATED FARMERS SOUTHLAND INCORPORATED** (with its successors and assigns called "the Farmers")

3. **THE SOUTHLAND REGIONAL COUNCIL** (with its successors and assigns called "the Council")

(together called "the parties")

BACKGROUND:

1. ECNZ operates the Manapouri Power Station under the provisions of the Manapouri Te Anau Development Act 1963 ("MTADA"), and the Resource Management Act 1991 ("RMA").

2. Section 4(1)(a)(i) MTADA provides that ECNZ shall have full power and authority to erect, construct, provide, use and operate all works, appliances and conveniences which may be necessary or requisite for or in relation to the utilisation of water power from the water resources of Lakes Manapouri and Te Anau, and the Waiau and Mararoa rivers and their tributaries.

3. In addition, ECNZ has the power to raise or lower the levels of Lakes Manapouri and Te Anau and the Waiau and Mararoa Rivers and their tributaries which are deemed consents to take and use water under the RMA, subject to operating guidelines, which are deemed conditions of these consents.

4. Subject to the provisos in sections 4A(2) and (5) of the MTADA, this Act allows ECNZ to carry out activities which would otherwise require resource consents under the RMA. However, the RMA deems ECNZ's uses of water to be water, coastal and discharge permits which expire on 1 October 2001. The RMA requires that the application for the permits to continue these uses of water consider inter alia the avoidance, remediation or mitigation of adverse effects on the environment.

5. ECNZ is of the view that, for the renewal of permits of the scope and significance of these, a broad consultation programme is not only appropriate, but essential.

6. To that end, ECNZ initiated the establishment of the Waiau Working Party in April 1990 to study the effects of hydro-electric power generation on the environment.

7. For a period of almost six years, the parties and other members of the Waiau Working Party have held meetings and commissioned a number of reports to consider the environmental, recreational, social, cultural and economic values and opportunities of the Waiau River catchment resource.

8. The Waiau Working Party has identified a series of provisions and conditions which they believe, if applied to the ECNZ's resource consents as conditions where legally possible and others incorporated into binding agreements ("the Agreements"), will provide recognition of the various values and opportunities and mitigate the adverse effects of ECNZ's operations and represent an acceptable outcome by retaining or enhancing the values identified while recognising the importance of the use of the resource for the generation of electricity.

9. By a Heads of Agreement dated the 16th day of July 1996 ("Heads of Agreement") those members of the Waiau Working Party consultation process who sign the document record the conditions they think should attach to ECNZ's resource consents when granted. Those conditions will then be included in a joint submission made by its signatories to the Council when it advertises the applications. The joint submission will ask the Council to adopt the agreed conditions and impose them as conditions on the grant of ECNZ's resource consents.

10. The Waiau Working Party's agreed conditions include one that seeks to prevent erosion, or remedy damage from erosion, which occurs or may occur as a result of the exercise of the permit to dam and divert the waters of Lake Manapouri and the Waiau and Mararoa Rivers by means of a structure known as the "Manapouri Lake Control Structure", as follows:

004.11 Erosion

The Consent Holder shall:

(a) take such precautionary measures which the General Manager, Council, may direct to prevent damage from erosion which is reasonably likely to occur as a result of the exercise of this permit;

(b) make such remedial repairs which the General Manager, Council, may require to remedy damage from erosion which occurs as a result of the exercise of this permit.

11. 11.1 By an Agreement dated 9 March 1973 the New Zealand Electricity Department (now ECNZ) and the Southland Catchment Board (now the Southland Regional Council) ("the Waiau Agreement") the Council is required, at ECNZ's expense:

a. to conduct regular surveys and take aerial photographs to identify and evaluate channel alterations which have occurred since work on the Manapouri Power Scheme commenced; and

b. at the request of ECNZ, any landowner, any local body, or on the Council's own initiative, to investigate and assess any matter arising from fluctuations in river flow, and identify possible remedial actions and their cost.

11.2 If ECNZ approves an action recommended by the Council through the mechanism described in 11.1.b of this Agreement, then ECNZ meets the full cost of that work unless the Agreement provides to the contrary.

11.3 If the Agreement does not require ECNZ to meet the full cost of work suggested through the mechanism described in 11.1.b then a sharing of the cost between landowners represented by the Council and ECNZ may occur, with disputes being referred to arbitration.

11.4 In discharge of its obligations under the Waiau Agreement, and as a result of other agreements entered into from time to time with landowners affected by changes in the Waiau River caused by the Manapouri Power Project, ECNZ has funded the costs of the Council in carrying out an agreed annual programme of vegetation control in the Waiau River floodway.

12. There are some values, opportunities and concerns identified by Federated Farmers Southland Inc, representing the adjoining landholders in the lower part of the Waiau River which the Farmers and ECNZ have agreed are better addressed by the provisions of this Agreement than by measures which could be incorporated formally as conditions of the resource consents. This Agreement records those matters, and the agreements reached between ECNZ and the Farmers. Those agreements recognise the importance of the use of the Waiau catchment resource for the generation of electricity, and the mitigation of effects arising from that use for farmers and other landowners in the Waiau catchment.

13. The parties intend that this Agreement and the erosion condition proposed for the resource consents as recorded in clause 10 of the background will:

a. replace the Waiau Agreement, the Council and ECNZ as successors to the signatories of it declare that it will now be cancelled in terms of operative clause 8 of this Agreement; and

b. continue to have effect (subject to clause 7.2) for a term ending on the date on which the resource consents proposed in the joint submission expire.

14. The New Zealand Electricity Department, and latterly, ECNZ, has accepted

responsibility for the loss of stock access to water occasioned by the need to fence river berms as a result of the lowering of the Waiau River.

THE PARTIES AGREE:

1. **Definitions**

"Adequate condition" means a fence that provides an effective barrier to stock at every point along its length.

"Agreed Programme" means an annual programme of river flood channel and berm fenceline vegetation spraying to be agreed each year by the parties. The programme shall require handspraying of vegetation along fencelines where the use of other methods would unreasonably interfere with the farmer concerned's normal farming practice.

"Fence" means a fence erected as a sheep and cattle stock barrier, whether or not continuous, and extending along the whole boundary of land contiguous to the Waiau River, and which separates the bed of the Waiau River from the land of adjoining rural land occupiers.

"Repair" means maintaining in an adequate condition and includes the obligation to progressively replace parts of fences as required.

2. The Farmers will join with other members of the Waiau Working Party in making a joint submission to the Council, consenting as effected parties, to the grant of ECNZ's resource consent applications numbers 001 to 007 (inclusive) subject to:

2.1 the conditions proposed for adoption by the Southland Regional Council on the grant of the consents as detailed in Schedule 1 to the joint submission; and

2.2 the terms of this Agreement.

3. ECNZ will ask the Council to grant its resource consent applications numbers 001 to 007 (inclusive) subject to:

3.1 the conditions agreed and listed in Schedule 1 of the joint submission; and

3.2 the terms of this Agreement.

4. This Agreement is subject to and conditional upon the Heads of Agreement not being avoided by any of the parties to that Agreement in terms of clauses 5 or 7 thereto.

5. If the Heads of Agreement are avoided pursuant to clause 5 or clause 7 of that Agreement, then:

5.1 this Agreement shall be at an end and be of no effect;

5.2 the parties shall be relieved of further performance of the obligations undertaken by them under this Agreement;

5.3 none of the parties shall have any claim against any of the others arising from any action taken in anticipation of this Agreement enduring; and

5.4 the Waiau Agreement shall be revived and shall continue to have effect between ECNZ and the Council according to its terms.

6. **Further Agreements**

6.1 ECNZ shall, provided the Heads of Agreement are not avoided by any of the parties to that Agreement in terms of clauses 5 or 7 thereto and the consents sought are granted:

a. fund the reasonable costs of the Council in carrying out an agreed programme of annual spraying of vegetation growth in the Waiau River flood channel from below the Mararoa Weir to the mouth of the river for the purpose of maintaining the efficiency of the flood channel in passing floodwater;

b. maintain, or fund the maintenance of the fences between the Mararoa Weir and the mouth of the Waiau River erected as a consequence of the Manapouri Power Project in a stock proof condition, and will repair those fences when damaged by flooding, slips or trees falling; and

c. ensure the Agreed Programme, and the work needed to maintain the fences, shall be detailed in a three year rolling plan to be agreed by the parties. The plan will require that any work not undertaken in any year shall be performed in the following year and financial provision for the same shall be carried forward and added to that succeeding year's work programme.

6.2 The parties record to avoid doubt that approximately 100 kilometres of fencing was erected as a consequence of the Manapouri Power Project; and

6.3 For the avoidance of doubt, nothing in clause 6 shall require ECNZ to maintain berm fencing on land owned by it (unless the maintenance of any particular length of fence has been specifically agreed in an annual

programme under this Agreement) or on the Tuatapere town floodbank.

7. 7.1 This agreement will continue in force for a term expiring on the date the resource consents referred to in the joint submission expire. If consents in substitution are granted under the Resource Management Act 1991 then the parties will negotiate in good faith the extension of the terms of this agreement on such terms as are then appropriate and the dispute resolution provisions of clauses 9.1 and 9.2 shall apply to the negotiation of such an extension of term.

7.2 The obligations of the parties under this Agreement shall be suspended if a special rating district for the Waiau catchment is established for the purpose of discharging the obligations of ECNZ under this Agreement.

7.3 If a special rating district is established for purposes including:

a. the maintenance of an effective flood channel in the Waiau riverbed from the Maroroa Weir to the river's mouth; and

b. the maintenance as defined in this Agreement of the fences erected as consequence of the Manapouri power project; and

c. the maintenance of the corridor through which the fences pass in a state free of undesirable plants;

and once rating income from landowners exceeds $10,000.00 per annum then ECNZ shall pay to the Council on behalf of the land occupiers represented by the farmers:

d. the sum of $200,000.00 a year annually (to be adjusted as provided in clause 7.5 of this Agreement); and

e. an additional sum at the rate of $1.00 for every dollar of rates collected from ratepayers in the special rating district.

7.4 The Council shall ensure that any money received under this agreement, after payment of all usual administration expenses and lawful charges, is first applied for the purposes set out in clause 7.3 above. Any surplus may be accrued as a capital fund for disaster relief in the Waiau catchment or for such other lawful purposes as the special rating district notice may allow.

7.5 All the sums payable under this Agreement shall be increased from year to year by the multiplier the Works Construction Cost Index published from time to time by Works Consultancy Services Limited declares is needed to maintain the purchasing power of money in 1996 dollars. The Index will

take effect from 1 July 1996. If Works Consultancy Services Limited ceases to calculate and publish the Works Construction Cost Index then such alternative index shall be used as Works Consultancy Services Limited shall nominate.

8. This Agreement shall be in substitution for the Waiau Agreement which shall cease to have force and effect from the date upon which this agreement comes into force as a result of the grant of the resource consents, upon which event both the Council and ECNZ shall be relieved of further performance of their obligations under the Waiau agreement, and neither party shall have any claim against the other.

9. 9.1 In the event of any dispute arising between the parties in respect of or in connection with this Agreement, the parties shall, without prejudice to any other right or entitlement they may have under this Agreement or otherwise, explore whether the dispute can be resolved by use of the alternative dispute resolution technique of mediation. The rules governing such techniques shall be agreed between the parties or as recommended by the New Zealand Law Society or as selected by the Chairman of the New Zealand Chapter of LEADR (Lawyers Engaged in Alternative Dispute Resolution).

9.2 In the event the dispute is not resolved within twenty eight days of written notice by one party to the other of the dispute (or such further period agreed in writing between the parties), either party may refer the dispute to arbitration under the provisions of the Arbitration Act 1908 or any Act passed in substitution therefore. The arbitrator shall be agreed between the parties within 10 days of written notice of the referral by the referring party to the other or failing agreement appointed by the President of the New Zealand Law Society. In either case, the arbitrator shall not be a person who has participated in any informal dispute resolution procedure in respect of the dispute.

10. Where the land of any farmer contiguous with the Waiau River or one of its tributaries or the profitability of the farm formed by such land is detrimentally affected by erosion caused by the exercise of resource consents held by ECNZ then ECNZ undertakes to negotiate in good faith with the landowner to find measures to mitigate and compensate the effects of such erosion on that farm.

11. Any notice given under this Agreement shall be in writing and delivered or transmitted as follows:

SOUTHLAND REGIONAL COUNCIL

Special Order

Waiau Rating District Proposal

3 June 1998

Public Copy
Please do not remove from premises

1.4 Waiau Rating District - 507/1/1

This is a new rating district. It arises from a combination of local ratepayer input, and the Agreement signed by ECNZ, Federated Farmers Southland, and the Southland Regional Council.

It has a unique advantage over other rating systems administered by the Council in that it will be predominantly funded by ECNZ, providing the rating district raises at least $10,000 (GST exclusive) annually.

Main Points:

- the district will include the catchment of the Waiau River, downstream of the Mararoa Weir, and includes some coastal catchments between the Waiau River and Fiordland National Park boundary.
- a local liaison group will be formed to look after the local interests.
- the signed agreement could be the founding document for any liaison group formed to look after the interests of the district.
- the proposed rating district is based on the land value rating system.
- the rating system has been designed from principles used on the Aparima and Oreti Rating District reviews that took place in 1994.
- a consultation process has been carried out in conjunction with the local representatives. Two recent public meetings were held, and all potential ratepayers (913) were notified by mail of the meetings.
- three existing rating systems currently operated by the Council have been absorbed into the proposed Waiau Rating District and provide the bulk of the local share funding.
- various interested groups have already indicated an interest in funding additional works, and it is envisaged regular amendments will be made in future years.

Recommendation

It is recommended that:

1. **Council proceed to make a Special Order to adopt the Waiau Rating District;**
2. **the Waiau Rating District take effect as from 1 July 1998.**

Special Order – Waiau Rating District

Pursuant to the Rating Powers Act 1988 the Council resolves to make and levy the Waiau Rating District separate rate on a differential basis coming into force on the first day of July 1998.

In accordance with the Rating Powers Act 1988, Section 41, and Part V (Differential Rating) in proposing to adopt a differential system of rating in the Waiau Rating District the Council has taken the following matters into account:

- the document agreement dated 8 November 1996 between the following parties:

  - Electricity Corporation of NZ Ltd
  - Federated Farmers Southland Incorporated
  - Southland Regional Council

- considered the benefits likely to accrue to properties within the District directly or indirectly are flood protection, improved drainage, noxious plant control, stock fencing on main channel, erosion control, maintenance of high quality water resource and protection of community assets.

- rates levied on the land value system of rating.

- has decided that the rate be based predominantly on benefit directly or indirectly to properties in the District. Except to the extent reflected in land values no account has been taken of the use of any property or any actions of the occupier. In proposing the differential rate the Council has taken into account as far as direct benefit is concerned:

  (i) the likelihood, frequency, depth and severity of flooding and erosion; and

  (ii) the likelihood, frequency, depth and extent of damage to land and the improvements to the land; and

  (iii) the improvement of drainage; and

  (iv) the need for water management generally – in relation to the actual and potential uses of the land and by reference to the advantages accruing from the works concerned and the responsibility for their care and maintenance.

As far as indirect benefit is concerned, the Council has taken into account:

(i) the establishment or preservation of economic units of land; and

(ii) the protection or establishment of water, sewage, drainage, electrical, gas and other services and or works, services and amenities to which rates from the land may be applied; and

(iii) the protection or establishment of communications and of any other property, service or amenity within or benefiting the land.

The proposed types of groups of property for differential rating in the Oreti Rating District are:

Class A	not used
Class B	not used
Class C	
C 1	not used
C 2	not used
C 3	not used
C 4	Sharpridge drainage system
Class D	
D 1	Lillburn willow control
D 2	Orawia willow control
Class E	
E 1	Riverside benefiting land
E 2	Tuatapere town
Class F	
F 1	Waiau catchment
F 2	Coastal catchments – western area
F 3	Orawia catchment
Class G	non-rateable – outside catchment areas.

To summarise, Class C, D and E are direct benefits reflecting various work functions and Class F identifies the indirect benefit areas.

The proposed system of differential rating has the object of establishing and preserving as far as practical the following relationship between the proceeds of the total rates received from the stated groups of properties.

The relationship is:

Class A	-
Class B	-
Class C 1	-
C 2	-
C3	-
C 4	200
Class D 1	150
D 2	500
Class E 1	10
E 2	50
Class F 1	1
F 2	0.5
F 3	1

The general effect of the relationship referred to above is to more equitably distribute the rating incidence throughout the various groups of property within the Waiau Rating District according to the type and value of work carried out and location of property.

After the Waiau Rating District is confirmed as a formal rating system, steps will be taken to discontinue the following existing annual maintenance rating systems:

Scheme 718	Orawia River Willow Control
Scheme 728	Sharpridge Stream Drainage maintenance
Scheme 833	Lillburn Willow control

And that the proposal for differential rating be open for inspection by the public at the offices of the Southland Regional Council, corner Price Street and North Road, Invercargill, during normal office hours without fee.

Any ratepayer may at any time after the confirmation of the special order, object to the Southland Regional Council in accordance with Section 116 of the Rating Powers Act 1988 against the allocation of a property to a particular type or group of property.

The Special Order will be submitted to Council for confirmation at a meeting in the Council Chamber scheduled for 5 August 1998.

Public Notice

SOUTHLAND REGIONAL COUNCIL

COUNCIL SPECIAL ORDERS

Notice is hereby given in terms of the Rating Powers Act 1988 that at a Special Meeting held on Wednesday, 3 June, 1998, the Southland Regional Council resolved by Special Order to amend the following rating districts and to introduce a new rating district to take effect on 1 July, 1998.

1. To reduce the differentials on lands in Ford and Ors drainage system, Otahuti, on the withdrawal of those lands from a drainage service - 6 rateable properties.
2. To reduce the differentials on certain lands in the Sobig drainage system, Mossburn, on the withdrawal of those lands from a drainage service - 8 rateable properties.

To alter the boundary of the drainage district to include lands requesting a drainage service - 2 rateable properties.

1. To reduce the differentials on lands in the rating district on the withdrawal of those lands from a drainage service - 6 rateable properties.
2. To adjust the differentials in the rating district to better reflect the benefits received from scheme works.

To introduce a new rating district on the lower Waiau Catchment system between the Mararoa Weir and Te Waewae Bay to secure funds in partnership with ECNZ to carry out main channel works and to maintain existing rating systems, namely the Lillburn, Orawia and Sharpridge.

The Special Orders will be submitted for confirmation at a Special Meeting of Council to be held in the Council Chambers, corner Price Street and North Road, Waikiwi, on Wednesday, 5 August, 1998, at 1.15pm.

The proposal to amend the differential system of rating in the named rating districts will be available for inspection by the public at the offices of the Southland Regional Council during ordinary office hours, and at Frasers Pharmacy, Tuatapere, during normal trading hours, without fee.

Any person upon inquiry either in person at the office of the Southland Regional Council, or in writing addressed to the General Manager, shall be advised of the category of property to which a particular property will be allocated.

Any ratepayer may at any time after the confirmation of the Special Orders object to the Council in accordance with Section 116 of the Rating Powers Act 1998 against the allocation of a property to a particular category.

This is the first public notice.

RESOURCE MANAGEMENT ACT 1991

PUBLIC NOTICE IS HEREBY GIVEN pursuant to S93 of the Resource Management Act 1991 that the following applications for resource consents have been received by the Southland Regional Council. These applications are available for inspection at the office of the Council, corner of Price Street and North Road, Waikiwi Invercargill

Item 6 507/1/1 – Waiau Rating District

Compiled by David Fraser, Senior Administration Officer

Summary

This rating district was formed last year and its rating year began on 1 July 1998. During the Special Order process, two groups of ratepayers petitioned the Council for amendments to the original proposal, but due to the late receipt of the petitions they agreed to hold over their requests to this year.

⇨ *Orawia Petition*

This petition from 26 landowners in the Orawia scheme requested that Council give consideration to amending the ratios between the D2 group and the F3 group to better balance the proportion of rates derived from the two groups (copies of petitions appended). The D2 classification represents the direct benefiting land from willow clearing maintenance on the main Orawia Stream and the F3 classification is the indirect benefiting land in the Orawia catchment.

D2 class provides	$9,928.45	93.97%
F3 class provides	$728.25	6.83%
	$10,656.70	100.00%

⇨ *Wairaki Petition*

A group of landowners on both banks of the lower reaches of the Wairaki River have requested to be included in the Waiau Rating District as a works scheme. Various one-off schemes have been carried out on the Wairaki River during the early 1980s to control vegetation and edge erosion, especially for the left bank landowners. There has been no formal ongoing funding arranged to carry out maintenance work and landowners have had to provide funds as work demands. A group of eight landowners are prepared to contribute local share on a regular basis as part of the Waiau rating system.

Under the terms of the Waiau agreement, both groups qualify for supplementary funding from Meridian Energy (formerly ECNZ). A copy of the summary data is appended.

Recommendation

It is recommended that Council:

1. **act on the petitions from the Orawia Stream and Wairaki River landowners;**

2. **proceed to make a Special Order to amend the Waiau Rating District as set out in this report;**

3. **note that the amendment is to take effect as from 1 July 1999.**

Report

Special Order Waiau Rating District

Pursuant to the Rating Powers Act 1988, the Council resolves to make a Special Order to amend the system of differential rating on the differentials listed below in the Waiau Rating District coming into force on 1 July 1999.

In accordance with Section 85, Rating Powers Act 1988, the following statements form part of the Special Order resolution.

1. Matters taken into account in preparing the alteration to the Waiau Rating District differentials.

1.1 *Orawia* – the need to adjust the differentials allocated to the D2 and F3 categories to better reflect the proportion of rates raised from each group.

- D2 ratio reduced from 500 to 400
- F3 ratio increased from 1 to 4.

1.2 *The effect on other ratepayers*

Class D2	a reduction from $9,928.45 to $7,844.25 (39 properties in this group)
Class F3	an increase from $728.25 to $2,876.80 (495 properties in this group)
Class C4) D1) E1) E2) E3) F1) F2)	no discernible effect

1.3 ***The need to introduce an appropriate differential to reflect the Wairaki group contribution made towards vegetation control and edge protection works***

- New differential Class E3 ratio 650
- Contributes $6,700 – eight properties

There will be no discernible effect on other ratepayers.

2. The current types of groups of properties in the Waiau Rating District have been altered by introducing Class E3 for the Wairaki landowners – all other groups remain the same.

3. The relationship between the various types of groups have been altered between Class D2 and Class F3 and introducing E3 – all other groups remain the same.

4. The general incidence of rates between the various groups have been altered as between Class D2 and Class F3 and a new Class E3:

   - Class D2 was 500 now 400 – decreased proportion
   - Class F3 was 1 now 4 – increased proportion
   - Class E3 650 – a new group

5. The changes have resulted from ratepayer petitions to the Council.

6. That the proposal is open for inspection by the public at the offices of the Southland Regional Council, corner Price Street and North Road, Invercargill, during normal office hours, without fee.

Any ratepayer may at any time after the confirmation of the Special Order, object to the Southland Regional Council in accordance with Section 116 of the Rating Powers Act 1988 against the allocation of a property to a particular type or group of property.

The Special Order will be submitted to Council for confirmation at a meeting in the Council Chambers scheduled for 21 July 1999.

⇨ Item 6 – 507/1/1 – Waiau Rating District

The Waiau Rating District was formed last year, and its rating year began on 1 July 1998. During the Special Order process, two groups of ratepayers petitioned the Council for amendments to the original proposal, but due to the late receipt of the petitions they agreed to hold over their requests to this year.

Resolved:

Moved Cr Collie, seconded Cr Wilson, that Council:

(1) act on the petitions from the Orawia Stream and Wairaki River landowners;

(2) proceed to make a Special Order to amend the Waiau Rating District as set out in this report;

(3) note that the amendment is to take effect as from 1 July 1999.

Special Order
Waiau Rating District

Pursuant to the Rating Powers Act 1988, the Council resolves to make a Special Order to amend the system of differential rating on the differentials listed below in the Waiau Rating District coming into force on 1 July 1999.

In accordance with Section 85, Rating Powers Act 1988, the following statements form part of the Special Order resolution.

1. Matters taken into account in preparing the alteration to the Waiau Rating District differentials.

   1.1 *Orawia* – the need to adjust the differentials allocated to the D2 and F3 categories to better reflect the proportion of rates raised from each group.

   - D2 ratio reduced from 500 to 400
   - F3 ratio increased from 1 to 4.

   1.2 *The effect on other ratepayers*

Class D2	a reduction from $9,928.45 to $7,844.25 (39 properties in this group)
Class F3	an increase from $728.25 to $2,876.80 (495 properties in this group)
Class C4) D1) E1) E2) E3) F1) F2)	no discernible effect

   1.3 *The need to introduce an appropriate differential to reflect the Wairaki group contribution made towards vegetation control and edge protection works*

   - New differential Class E3 ratio 650
   - Contributes $6,700 – eight properties

   There will be no discernible effect on other ratepayers.

2. The current types of groups of properties in the Waiau Rating District have been altered by introducing Class E3 for the Wairaki landowners – all other groups remain the same.

3. The relationship between the various types of groups have been altered between Class D2 and Class F3 and introducing E3 – all other groups remain the same.

4. The general incidence of rates between the various groups have been altered as between Class D2 and Class F3 and a new Class E3:

   - Class D2 was 500 now 400 – decreased proportion
   - Class F3 was 1 now 4 – increased proportion
   - Class E3 650 – a new group

5. The changes have resulted from ratepayer petitions to the Council.

6. That the proposal is open for inspection by the public at the offices of the Southland Regional Council, corner Price Street and North Road, Invercargill, during normal office hours, without fee.

Any ratepayer may at any time after the confirmation of the Special Order, object to the Southland Regional Council in accordance with Section 116 of the Rating Powers Act 1988 against the allocation of a property to a particular type or group of property.

The Special Order will be submitted to Council for confirmation at a meeting in the Council Chambers scheduled for 21 July 1999.

Carried

14.10 Agreement between ECNZ, Federated Farmers of NZ Limited and the SRC

This agreement has the following provisions:

- Fund the reasonable costs of the council in carrying out an agreed programme of annual spraying of vegetation growth in the Waiau River flood channel.
- Maintain or fund the maintenance of the fences between the Mararoa Weir and the mouth of the Waiau River erected as a consequence of the Manapouri Power Project in a stock proof condition, and will rebuild or repair those fences when damaged by flooding, slips or trees falling; and
- ensure the annual spraying programme, and the work needed to maintain the fences, shall be detailed in a three year rolling plan to be agreed by the parties. The plan will require that any work not undertaken in any year shall be performed in the following year and financial provision for the same shall be carried forward and added to that succeeding year's work programme.

This Agreement will continue in force for the term of the resource consents unless a special rating district for the Waiau Catchment is established. Should the rating district come into force, this Agreement shall be suspended.

The special rating district is to be established for:

- the maintenance of an effective flood channel in the Waiau riverbed from the Mararoa Weir to the river's mouth; and
- the maintenance of the fences erected as a consequence of the Manapouri Power Project; and
- the maintenance of the corridor through which the fences pass in a vegetation free state

If the special rating district is established, then ECNZ shall pay to the Council on behalf of the land occupiers represented by the farmers:

- the sum of $200,000 a year annually; and
- an additional sum at the rate of $1.00 for every dollar collected from ratepayers in the special rating district other than ECNZ; and
- any surplus funds to be accrued as a capital fund for disaster relief in the Waiau Catchment.
